SAMPLE ACCOUNTABILITY

Titanium — Your Single Source for Hand-Carry Sample Compliance

Our Titanium® Sample Accountability / Hand-Carry / Direct to Representative Program is designed to provide comprehensive insights and compliance management in sample distribution. With 24/7 access to a validated cloud-based dashboard, clients can monitor program insights in real-time, ensuring compliance with PDMA regulations and internal business rules. Our program is backed by an experienced Sample Accountability Analyst Team, which oversees reconciliations, returns, transfers, and adjustments, along with proactive monitoring of sales representative inventories to prevent significant losses and ensure compliance.

→ We equip sales representatives with an integrated suite of tools, including a user-friendly ordering portal and access to continuing education courses as required to enhance their efficiency and compliance. Our comprehensive program offers extensive training on PDMA regulations and support for licensing and certification across multiple jurisdictions. Additionally, we ensure rigorous adherence to regulatory standards through robust field inventory management, practitioner validation, and signature auditing.

→ Titanium provides advanced reporting for insightful analysis across all sample programs. We ensure regulatory compliance through validation of practitioner licenses and strict adherence to federal and state reporting requirements. Our DDA-compliant fulfillment services cater to a range of product storage and shipping needs.

Strength Through Intelligence

SAMPLE ACCOUNTABILITY
